

Software Assessment Form (SAF)

Introduction

ProjectControlsOnline (PCO, <http://www.projectcontrolsonline.com/>) uses this Software Assessment Form (SAF) as a simple assessment tool to evaluate the technical project management software.

By using this consistent set of criteria (scoring based assessment) for assessing the technical software, PCO will make it more efficient and easier for our members to compare and distinguish when reviewing/selecting the appropriate tools for use in their organisation/project with consideration of their unique requirements. We use the scoring based assessment criteria below:

1

+ve

PCO Team is assessing the software totally independent of the vendors and while taking the maximum effort to be accurate, does not accept any responsibility of the software application/s and/or its performance in the practical environment. Users are encouraged to do their own assessment of the software before making the decision for any application.

Name of Assessor/s:

Pedram Daneshmand, Senior Associate Director,
Blue Visions Management Pty Ltd, Contact - pedramd@bluevisions.com.au

ProjectControlsOnline.com is not-for-profit organisation and managed by a global network of Senior Project Controls professionals who come from a variety of different industries. We are independent and not biased towards any technology, process, software or company

8

9

10

E) Reports (excluding graphics)

- Pre-built standard reports are available – YES, comparison and analysis reports are available in both graphical and tabular formats. Also both detailed and summary level reports are available.
- Custom reports are available – not all features are available for analysing “Individual Project” as well as “Projects Comparison”, like resource view is only available for “Projects Comparison” but not for individual project analysis.
“Forecast Trend” does not estimate the trends of individual resources by using the history of the actual production.
- Query Builder for reports – not very comprehensive, for example the resource comparison report only provides change in “Total Planned Units” and “Remaining Early Units” of any resource assigned to any activity.
- Reports to be exported as .csv, .xls and .pdf – YES
- Auto reports generation and distribution – has not been checked
